

WE create safe healthy environments

We care about *your* health

Our company focuses on providing UV solutions to
Purify Air & Sterilize Surfaces
to protect and keep your employees, customers and loved ones safe & healthy.

- ✓ Did you know that UV can reduce spreading biological contaminants, allergens and reproduction of mould, bacteria, biological odours and airborne viruses such as SARS, H1N1 and Coronavirus?
- ✓ Did you know that indoor air is 100 x more polluted than outdoor air?
- ✓ Ask us how UV helps alleviate allergies, asthma and flu symptoms.
- ✓ We have partnered with a Canadian manufacturer who is a global leader in UV air purification & sterilization systems for over 25 years.
- ✓ We have affordable options to rent, lease or purchase for all your residential & commercial needs.
- ✓ The foundation pillars of our company are: improving lives, affordability, professionalism and integrity.

Proudly
Canadian

**We are confident
in our solutions & products.
We offer 30-day no
questions asked return policy.**

First, how does UV work?

The sun projects **UV rays** with specific wavelengths which **destroy and deactivate contaminants** that are in the atmosphere. UV air purification systems produce the same UVC & UVB wavelengths, **bringing the same natural process inside homes and buildings.**

Ask us about our full offering of products for any residential or commercial application in addition to these portable options:

We offer rental or lease as low as \$39/month or buy option

Portable UV Air Purifier

	Proprietary high-intensity UV J lamp with UVC & UVB wavelengths make biological, chemical & odor destruction possible
	Portable – move to where you need it
	Eliminates odors & chemical containments
	Eliminates germs
	Eliminates volatile organic compounds VOC's
	Purifies up to 900 square feet

13.23"W x 9.25"D x 23.43"H; 13.2 Lbs.

11.66"W x 3.91"D x 18.66"H; 11 Lbs.

BENEFITS:

- ✓ Protects from airborne germs
- ✓ Reduces common household odors
- ✓ Helps alleviate allergies and flu symptoms
- ✓ Helps control asthma
- ✓ Improves sleep

We offer rental or lease as low as \$119/month or buy option

HEPA & UV Air Disinfection Unit

	Proprietary high-intensity UV J lamp with UVC & UVB wavelengths make biological, chemical & odor destruction possible
	Portable – move to where you need it
	Eliminates odors & chemical containments
	Eliminates germs
	Eliminates volatile organic compounds VOC's
	Commercial grade HEPA Filter eliminates mould in the air

17" W x 13" D x 35.25" H

BENEFITS:

- ✓ Protects immuno-compromised patients
- ✓ Sterilizes airborne biological contaminants, including viruses and bacteria
- ✓ Destroys chemical contaminants, odors and VOCs

Designed for nursing homes and medical clinics to improve air quality of immuno-compromised patients; also ideal for commercial use with our 4-step air disinfection process: 1. Germicidal UV destroys bacteria, viruses and mould 2. Oxidation treats odors and chemicals 3. Pre-filtration protects the blower 4. HEPA filtration captures fine dust particles
